9.	Polybag, hangtag, retail packaging	Major finding
10.	Documentation cross-check vs PO	Pass

Inspector's Comments

Order quantity verified at 3,200 pcs, fully packed and ready for shipment. Random sampling of 200 pcs (ISO 2859-1, Level II Normal) revealed 0 critical, 8 major (4 plating + 4 packaging compliance) and 12 minor defects — all within AQL 0/2.5/4.0 acceptance limits. Supplier has agreed to replace the 4 under-plated pieces and update polybag warning labels before container loading. Recommendation: **Release shipment** after corrective actions are photo-confirmed.

Recommendation

Release shipment after 2 corrective actions confirmed (24 hrs).
